EDUCATION

Bachelor of Technology - Computer Science & Engineering Jul '24 - May '28

Delhi Technological University | Delhi, India

GPA: **7.843**

Courses: Operating Systems, Data Structures, Analysis Of Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases, Web Development

EXPERIENCE

Software Engineering Intern Feb '26 - May '26

Webdesino | Remote

- Built and deployed a **full-stack CMS platform for a legal services firm**, enabling content management, lead handling, and administration of 100s of customer enquiries
- Engineered business-critical **e-commerce workflows** including Shiprocket integration, payment processing, inventory validation, invoice generation, and multi-currency support for a **B2B/B2C apparel platform**
- Designed and developed an **Employee Management Portal** from scratch, streamlining internal workforce operations and administrative workflows
- Delivered frontend systems and administrative interfaces for enterprise clients, collaborating across multiple **production projects** with real-world users and business stakeholders

Web Developer Jan '26 - Feb '26

FocusDesk (Startup) | Remote

- Built and deployed **full-stack QR access control system** using React, Node.js, Express, and MongoDB, enabling secure user onboarding and real-time access validation
- Engineered **RESTful backend APIs** with **JWT-based QR authentication, Firebase Admin verification, and dynamic QR validation** and attendance logging

Backend Intern Jan '25 - Jun '25

ProgrammingKnowledge | Remote

- Built **backend systems** using Python, Django, and Django REST Framework, including REST APIs, authentication, CRUD flows, and database integration
- Impact: Backend content reached **25K+ views**, demonstrating practical understanding of scalable backend development

PROJECTS

Smart Waste Bin Monitoring System Dec '25

C++, TCP Sockets, HTTP Protocol, OOP, HTML, CSS, JavaScript

Github: Link

- Built a custom HTTP backend in C++ using TCP sockets for real-time waste bin monitoring
- Designed modular OOP architecture with Bin and BinService classes for state and service logic
- Implemented HTTP request parsing, routing, and response handling
- Developed frontend dashboard to visualize bin data and interact with backend

Tatva – The Gamified Space Adventure for Learning Aug '25

Next.js, React, TypeScript, TailwindCSS, Supabase, Gemini API, Capacitor

YouTube Demo: Link, Github: Link

- Integrated AI chatbot and mascot using Gemini API and Web Speech API
- Implemented real-time leaderboard and teacher dashboard with backend integration
- Deployed cross-platform app using Capacitor for mobile compatibility

SKILLS SUMMARY

- **Languages:** C++, Python, JavaScript, TypeScript
- **Frontend:** React, Next.js, Vite, TailwindCSS, HTML, CSS
- **Backend:** Node.js, Express, Django, REST API design, JWT Authentication, Firebase Admin
- **Databases:** MongoDB, SQL, Supabase, Firebase Firestore
- **Machine Learning:** Scikit-Learn, Pandas, NumPy, TensorFlow

HONORS AND AWARDS

- Smart India Hackathon 2025 – Internal Round Winner, Finalist - 2025
- Champion Milestone Achiever – Google Cloud Arcade Facilitator Program - 2024
- Finalist – CodeInTheDark Live Coding (IEEE GTBIT) - 2024
- Dell Aspire Scholar – Dell Scholar Cohort - 2024
