EDUCATION

Examination/Degree	Year	Institution	Marks/CGPA
B.TECH (Computer Science & Engineering)	2024-2028	Delhi Technological University, New Delhi	7.84
CBSE (Class XII)	2023	Govt. Sarvodaya Co-Ed. Vidyalaya, Jaffar Pur Kalan, N.D.	91.2 %
CBSE (Class X)	2021	Govt. Sarvodaya Co-Ed. Vidyalaya, Jaffar Pur Kalan, N.D.	90 %

INTERNSHIPS

Software Engineering Intern, Webdesino Feb 2026 – May 2026

- Developed and deployed a full-stack **Content Management System (CMS)** for a legal services platform, streamlining publishing workflows and managing **100+ customer enquiries**.
- Forged core backend functionalities for a production **B2B/B2C e-commerce platform**, implementing order processing, payment workflows, inventory validation, invoicing, and multi-currency support across **180+ countries**.
- Formulated an **Employee Management Portal** that automated administrative workflows, reducing manual task completion time by **30%**.
- Delivered production-ready admin dashboards and client-facing interfaces for **5+ enterprise clients**, shipping features from development to deployment.

ACADEMIC PROJECTS

GramAI – Voice-to-Triage GenAI Pipeline for ASHA Workers 2026

Python, Groq API, Whisper v3, Llama 3.3 70B, Telegram Bot API, FastAPI, Pandas, React

- Engineered an end-to-end **multimodal GenAI pipeline** for rural health workers: a Telegram bot ingests Hindi, Hinglish, and English voice notes, transcribed via **Whisper Large v3** with a prompt tuned for Indian medical terminology.
- Designed a **prompt-engineered LLM triage agent** on **Llama 3.3 70B** for structured extraction of symptoms/vitals and bilingual (Hindi + English) recommendations, with **hallucination guardrails** that flag unrecognized input.
- Built a **FastAPI + Pandas** REST/JSON service over the timestamped patient registry, consumed by a **React** review dashboard.

Ledger Copilot – AI Settlement Reconciliation Agent Aug 2026

Next.js, TypeScript, Supabase, Gemini API, Tailwind CSS, Vercel

- Engineered a **deterministic reconciliation engine** using exact and fuzzy matching across two synthetic settlement sources, achieving a **79%+ match rate** over 130+ records, 6 exception types, and **60+ passing tests**.
- Built a grounded **Settlement Q&A agent** using the **Gemini API** with function calling, binding the model to 3 verified API routes so every answer traces to real data, eliminating hallucinated figures.
- Designed and **deployed** a full-stack dashboard (Supabase-backed API, Vercel) visualizing match rate, exception breakdowns, and an embedded chat interface.

Smart Waste Bin Monitoring System Dec 2025

C++, TCP Sockets, HTTP Protocol, OOP, HTML, CSS, JavaScript

- Engineered a lightweight **HTTP server in C++** from scratch using TCP sockets, with 6 custom endpoints and no external web frameworks.
- Designed a **modular OOP backend** (custom HTTP parsing, routing, service layers) powering a live dashboard for 10 simulated smart bins.

ACADEMIC ACHIEVEMENTS AND AWARDS

- **McKinsey.Org Forward Scholar'26** – Selected as a 2026 Forward Scholar by McKinsey.org.
- **Smart India Hackathon 2025** – Won the Internal Round and advanced as a Finalist in the national-level innovation competition.
- **Dell Aspire Scholar 2024** – Selected as a member of the prestigious Dell Aspire Scholar Cohort 2024.
- **Industry Project – Infinity Cars × Clever Harvey** – Industry-driven project delivering practical business solutions.

TECHNICAL SKILLS

C++, Python, JavaScript, TypeScript, Java, HTML, CSS, LLMs, Prompt Engineering, Embeddings, RAG, Multimodal AI, AI Agents, Tool Calling, Multi-Agent Systems, LLM Evaluation	LangChain, LangGraph, LlamaIndex, CrewAI, AutoGen, Gemini API, Groq API, Whisper, Claude Code, Cursor, React, Next.js, Vite, Tailwind CSS, Node.js, Express	Django, FastAPI, REST API design, JWT Authentication, Firebase Admin, MongoDB, SQL, Supabase, Firebase Firestore, Pandas, Git, GitHub, Docker, Linux, Postman, Vercel, Render, Nginx
